Reverse a Number in C++

```cpp
#include <iostream>
using namespace std;
int main() {
    int num, rev = 0;
    cin >> num;
    while(num > 0) {
        rev = rev * 10 + num % 10;
        num /= 10;
    }
    cout << rev;
    return 0;
}
```
